PROFILE

IT manager with 15 years' experience in managing digital projects and supervising multidisciplinary teams. Specialised in multi-platform front-end development. Recognised for my leadership, ability to bring people together, organisational skills and quality orientation. Driven by innovation, continuous improvement and a management style that encourages autonomy, collaboration and commitment.

SKILLS

Team management & Leadership

- Managing multi-disciplinary technical teams (frontend, mobile, project) in Agile mode.
- Recruiting and supporting talents by encouraging them to develop their skills, autonomy and commitment.
- Unite around a culture of rigour, collaboration and continuous improvement.
- Encouraging initiative and individual creativity in the service of shared objectives.

Project management & Operational efficiency

- Managing complex digital projects with rigour and adaptability.
- Coordinating stakeholders (PO, Architects, Infrastructure, QA, Data) to ensure high-quality deliverables.
- Solve technical and organisational problems using a structured, solution-oriented approach.
- Prioritising tasks, managing time efficiently and adhering to budgets in a multi-project environment.
- Overseeing contractual (DocuSign, Yooz) and technical relations with suppliers.
- Working effectively in a hybrid environment (face-to-face/off-site), with iterative deliveries.

Quality, innovation & Tools

- Implementing robust quality processes: code reviews, self-testing (Katalon), documentation.
- Proposing innovative solutions through active, customer-focused technology monitoring.
- Use project management tools (Jira, Redmine) and versioning tools (Git).

EXPERIENCES

Head of Video Squad - Alchimie

2019 / 2025 – Hybrid : Le Havre / Paris

- Managing a multidisciplinary team of 8 people (integrators, Symfony developers, Apple/Android developers, project managers) in charge of web, mobile and TV front-end development in Agile mode.
- Overseeing the design (Figma), development and TMA of B2B/B2C video streaming solutions:
 - VideoWall: White-label SaaS platform (Maisons du Monde, Bauer Media, Decathlon).
 - 42videobricks: VPaaS solution for hosting and broadcasting videos.
- Managing the internalisation of the TVPlayer platform (SVOD/Live) in 6 months (€1m/year savings).
- Managing and coordinating projects with B2B customers (Maisons du Monde, Bauer Media).
- Coordinating activities with the product, architecture, middleware, backend, infrastructure, QA and data (Splunk, Tableau) teams in order to guarantee the quality of deliverables (weekly releases).
- Contributing to the quarterly product roadmap (UX/UI, Video Player, etc.) through active technology monitoring, anticipation and innovative development proposals.
- Manage partnerships with suppliers (THEOPlayer, BuyDRM, NPAW, Didomi, Matomo).
- Providing level 2 and 3 user support (Zendesk)
